TITLE : DIGITAL SOUND RECORDING AND
REPRODUCING DEVICE AND DIGITAL
REPRODUCING DEVICE

CONSTITUTION: A magnetic recording medium is used as a recording medium 4. Buffers A and B are provided. At the time of sound recording, alternate writing of voice data from a voice processing circuit 3 to the buffers A and B is controlled and a CPU 1 controls alternate reading of the voice data from the buffers A and B, where the writing of the voice data by the DMAC 2 has been completed, to the recording medium 4 for the voice data. At the time of reproduction, the CPU 1 controls alternate writing of the voice data from the recording medium 4 to the buffers A and B and the DMAC 2 controls alternate reading of the voice data from the buffers A and B, where the writing of the voice data by the CPU 1 has been completed, to the voice processing circuit 3.
